### Percent Population Infected Per Country

World map showing the percent population infected per country. The map uses a light gray background with white country borders. Data points are represented by circles of varying sizes and colors (orange, yellow, brown). The size of the circle indicates the percentage of the population infected, and the color indicates the percentage of the population infected. The map shows a high concentration of large, orange circles in Europe and North America, indicating high infection rates. Smaller circles are scattered across Africa, Asia, and South America. The map is powered by Esri.
